

Quarantine Inbox

There are several ways to get to the Barracuda spam filter.

1. By clicking the link in your email from the Barracuda spam filter
2. By going to <http://Arnold.hssd.k12.wi.us:8000>
3. By going to <http://www.hssd.k12.wi.us/nospam>

Once you successfully log into the Barracuda Spam Firewall you will get a list of messages that it has quarantined. The list will look something like what you see here:

Scan/View Destination By BARRACUDA

If you just want to delete **ALL** the messages shown, click the checkbox to the LEFT of the word DATE and it will put a checkmark next to all messages shown here. Then click on the Delete button. **CAUTION: Once you delete messages, we can't get them back, so don't ask us to un-delete things you have accidentally thrown away.**

The goal is to go through the messages in three passes,

First, mark only those you want to delete and take action on them

Next, then mark only those you wish to whitelist and take action on them

Finally, and then mark only those you wish to have delivered to you and take action on them.

Deliver - Put an checkmark to the left of each message you want to receive, and click the "deliver" button. Only mark those messages you wish to receive.

Whitelist - When you whitelist senders, you mark them so that you will always receive their messages in the future. Put a checkmark to the left of each message where you want to "whitelist" a sender. Then click the "whitelist" button.

Delete - Put a checkmark to the left of each message you wish to delete, then click the "delete" button. Mark only those messages you wish to delete. These will be added to the SPAM learning engine and help prevent further deliveries.
